

AFNIC *Change & Config*

Enterprise Change/Config Management

The AFNIC Enterprise Change and Configuration Management team is responsible for ensuring all change requests affecting the Enterprise have been properly documented, reviewed, and approved.

They are also responsible for versioning and maintenance of all Core Enterprise Services' documentation ensuring consistent deployments and continual operation of critical enterprise assets.

Change/Configuration Management

Our services include:

- Steward AFNIC changes through 24 AF Enterprise Change Management processes
- Provide recommendations/tech solutions to Enterprise Change Advisory Board (CAB)
- Maintain standard Enterprise Configuration Items
